About Me

I'm a growth-oriented full-stack developer with an enthusiasm for well-crafted software. I understand quality is complex, and aim to deliver the highest value to all stakeholders. I place a huge emphasis on learning and love to continually challenge my existing capabilities.

Looking For

I'm looking for a team-oriented role that will push me out of my comfort zone and encourage me to learn. I would love the opportunity to work with people that value modern software engineering practices and care deeply about the web and product quality.

Key Skills

Front-End

HTML	CSS	JS	TypeScript
React	Aurelia	SASS/LESS
Webpack	Parcel	PWAs

Back-End

Node	Express	Postgres	MongoDB
REST APIs	GraphQL	WebSockets
Data Modeling	Service Architecture

DevOps/Design

AWS	Azure	GitHub
Docker	CI/CD	Linux
Figma	Illustrator	XD

Professional Experience

Full Stack Developer
AAA Flag & Banner
'17 — Now

React · Node · TypeScript · PWAs

- As part of a small team, developed several web applications enabling a company-wide migration from pen and paper processes
- Demonstrated ability to design, prototype, and build feature-rich web applications from start to finish
- Hands-on experience with modern technology including React, TypeScript, progressive web apps, and hybrid mobile apps

Freelance Developer
Personal Contacts
'17

HTML · CSS · Design

- Worked with clients under tight deadlines to design and build responsive websites
- Managed project deadlines, client communication, incorporating and advising on client feedback
- Owned testing and deployment processes

Personal Projects

Directus Gatsby Source Plugin
Gatsby · Node · GraphQL

- Built a plugin used to expose data held in a Directus CMS instance to the GraphQL layer of a Gatsby project
- Features included request pagination, batch file downloads, rate limiting, custom filters, resolution of many to many relations

go-exif
Golang

- A small CLI utility to extract embedded EXIF data from sample JPEG images
- Parse raw JPEG EXIF segments per the JEITA CP-3451 specification

Calcu-Hater
Svelte · Tailwind

- A front end calculator allowing users to enter LaTeX formatted equations and solve while displaying lighthearted jokes
- Built to experiment with the Svelte framework

Bundy.lol
React · Express · Mongo

- A group-based task manager, allowing users to share task boards
- Key challenges include client-side state management, implementing authentication, and database integration

Personal Website
Three.js · WebWorkers

- Developed a small responsive website to centralize contact info
- Managed deployment process using Netlify
- Custom-built animation using Three.js

Education

Georgia Tech
MS in Comp. Sci.

- **In Progress.** A Masters in CS specializing in Computing Systems with a sub-focus in Machine Learning

S.M.C
AA in Comp. Sci.

- Completed an Associates in CS from Santa Monica College. Graduated with a 4.0 GPA

Online MIT OCW

- Continued education via MIT OpenCourseWare
